Atlanta, GA

## SUMMARY

Experienced Senior Software Engineer with 10+ years of expertise in full-stack development. Proven track record of delivering high-quality projects within tight deadlines. Strong problem-solving and analytical skills, coupled with a passion for innovation. Effective collaborator and team leader. Dedicated to continuous learning and staying abreast of industry trends.

## EXPERIENCE

### Lead Software Engineer

#### Cognizant

12/2020 - Present Atlanta, GA

A multinational technology company that provides digital strategy, IT consulting, software development, and outsourcing solutions to global clients across various industries

- Spearheaded the successful delivery of cutting-edge software solutions within the healthcare sector at Cognizant, overseeing a talented team of software engineers. Ensured adherence to strict project timelines and stringent quality standards
- Collaborated closely with cross-functional stakeholders, including product managers, architects, and business analysts, to gather comprehensive requirements, establish project scope, and drive the seamless implementation of robust technical solutions
- Demonstrated expertise in overseeing code reviews, delivering technical mentorship, and nurturing the professional growth of junior team members, leading to enhanced proficiency and productivity across the team
- Championed the adoption of agile methodologies and implemented efficient continuous integration/continuous deployment (CI/CD) pipelines to optimize the software development lifecycle, streamline processes, and enhance overall project efficiency

### Senior Software Engineer

#### Meta

08/2015 - 12/2020 New York, NY

A pioneering technology company, known for developing cutting-edge augmented reality devices that seamlessly merge virtual objects with the real world, enabling revolutionary experiences in gaming, productivity, and communication

- Led a cross-functional team in the development and deployment of an internal collaboration platform that streamlined communication and project management, resulting in a 30% increase in team productivity
- Implemented a data analysis tool that automated the process of collecting and organizing internal data, saving an average of 10 hours per week for each team member and improving data accuracy by 20%
- Conducted in-depth research on emerging technologies and their potential applications in internal processes, leading to the successful integration of a virtual reality training program that reduced onboarding time for new employees by 40%
- Collaborated with HR and IT teams to enhance the employee onboarding experience, creating an interactive onboarding portal that provided 24/7 access to resources, reducing onboarding time by 50% and increasing employee satisfaction

## STRENGTHS

### Software Engineering

Developing and maintaining robust software solutions for various industries

### Web Technologies

Proficient in web technologies

### Communication Skills

Known for excellent communication

## EDUCATION

### Bachelor's Degree in Computer Science

#### Nanyang Technological University

09/2009 - 03/2013 Singapore, Singapore

### Bachelor's Degree in Management, Economics

#### Hope College

09/2003 - 05/2007 Holland, MI

## SKILLS

Javascript

Typescript

Styled Components

## EXPERIENCE

---

### Software Engineer

#### The College Board

📅 04/2013 - 08/2015    📍 Edison, NJ

A leading global organization developing innovative software solutions to empower students and educators, expanding educational opportunities and promoting student success

- Collaborated with senior software engineers to design and develop full stack applications for CollegeBoard's educational platforms
- Implemented front-end functionalities using JavaScript and React, ensuring the smooth user experience and interface design
- Conducted code reviews and executed unit tests to maintain high-quality standards and optimize application performance
- Worked closely with cross-functional teams to gather requirements, address technical issues, and contribute to the identification and resolution of software defects and bugs

## HOBBIES AND INTERESTS

---

### Physical Fitness and Exercise

Active participation in various physical activities such as running, cycling, swimming, and actively engaging with local sports teams.

### Art and crafts

Embracing artistic expression through a wide range of creative activities such as painting, sketching, sculpting, and the intricate art of knitting

### Cooking or baking

Experiment with different recipes, try new cooking techniques, and explore the culinary world. This hobby allows you to unwind, be creative, and enjoy the delicious results
